## CYCLE SOUNDS 12 - 6 VOLT INVERTER FOR ADDING SATELLITE RADIO

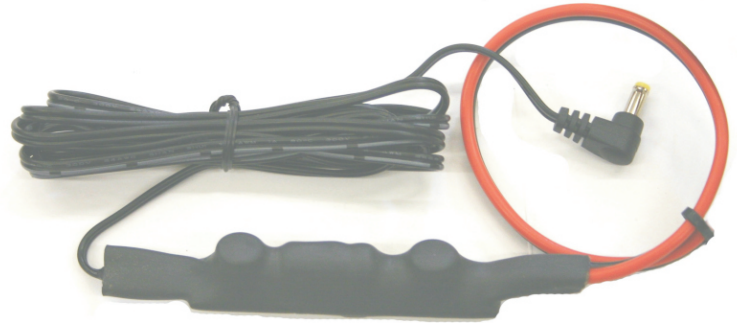

### GENERAL:

This 12 - 6 VOLT inverter has been engineered by CYCLE SOUNDS So that you can add most any satellite radio systems to a bike, car, etc.

### INSTRUCTIONS:

**Step 1:** Take a digital meter and find your 12 volt switched ignition source. Tap **red** wire on inverter to 12 switched ignition source. Take black ground wire of inverter and ground to battery or frame.

**Step 2:** run power plug up to satellite receiver and plug power plug into satellite radio. Turn unit on to verify it works, then wire tie any excess wires

**CAUTION:** it is possible to overload your motorcycles charging system by adding too many electrical accessories. Please use amp meter to verify all power connections. Also check product power ratings for anything you are trying to install. Exceeding the maximum amperage can lead to electrical failures, which could result in serious injuries or even death.
