

# iTunes Import Settings Tutorial

To import your music into iTunes at the highest quality possible please follow this tutorial. This will ensure you get the best volume and sound out of your Cycle Sounds speaker system. Previously imported music will need to be re-imported to utilize these settings.

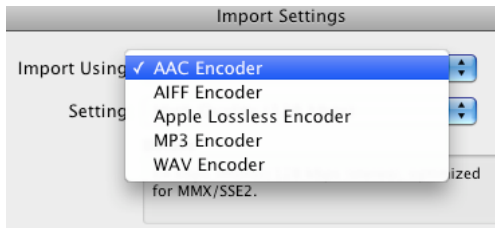

1) Open iTunes Preferences from the iTunes menu

2) From the “General” tab select the “Import Settings” button

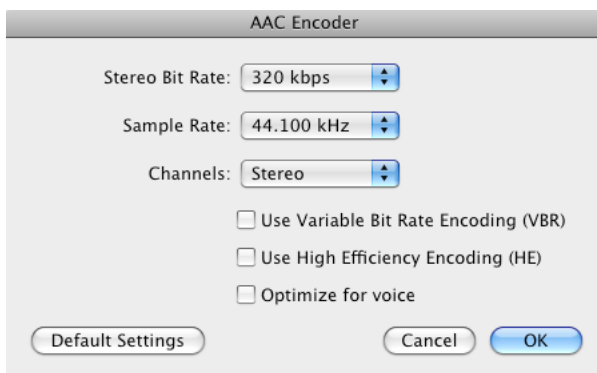

3) Select “AAC Encoder” from the “Import Using” dropdown menu

4) Select “Custom” from the “Settings” dropdown menu

5) Select “320 kbps” from the “Stereo Bit Rate” dropdown menu

6) Select “OK” and you are ready to import music in high quality!
